

POSITION: Actuarial Co-op, Life & Health (2023 Winter or 2023 Summer - Toronto, 4 months)

LOCATION: Toronto, ON

DURATION: 4 Months

ANTICIPATED START DATE: Winter - January 2023, Summer - May 2023

NUMBER OF POSITIONS: Winter - 10, Summer - 10

APPLICATION DEADLINE: September 20, 2022

Together, we engage with everything we have and are, to help humankind act braver and better.

As the world's leading reinsurance company with more than 40,000 employees in over 50 locations around the globe, Munich Re introduces a paradigm shift in the way you think about insurance. By turning uncertainty into manageable risk, we enable fundamental change. We recognize Diversity, Inclusion, and Belonging as a key priority with a culture that welcomes different thoughts and opinions. We dare to think big and are continuously innovating on behalf of our clients.

Our data, our technology, and our teams place us in a unique position to drive transformative change in the life insurance industry. We invest strategically in our world class talent, offering our employees a work experience that promotes professional development, innovation, and rewards high performance.

Our co-op placements provide you with an excellent opportunity to practically apply your classroom and technical training in the reinsurance industry. While with our team, you'll be; coached by experienced industry professionals, exposed to Munich Re leadership, challenged as a valuable team member and contributor doing meaningful work, and mentored to develop a solid foundation that will help position you as a future leader in the field.

Position Overview

You'll work closely with other Actuarial Associates and Actuaries within their respective departments, as well as with other key individuals across the organization in our Toronto and/or Montreal office.

Note that work placements by department will be assigned closer to the term start date based on a number of factors, not limited to: your interest, skill set, and internal business needs.

Job Responsibilities

Work term responsibilities will vary depending on the department you're placed; which may include, but not be limited to the following:

Biometric Research:

- Assist with developing mortality, morbidity, and lapse assumptions for Life and Living Benefits insurance products;
- Conduct and review company and industry experience studies;
- Develop actuarial insights from analyzing large Canadian and US datasets;
- Support Pricing and Valuation on pricing quotes and assumption review/analysis;
- Prepare presentations and other material to communicate results internally or externally.

Individual Reinsurance Solutions:

- Evaluate and communicate profitability for pricing reports, reinsurance proposals;
- Model (AXIS) and make recommendations for client requests and special quotes;
- Assess profitability impact on new business portfolio from changes in assumptions and methodologies;
- Present analysis, results and recommendations to project leads;
- Help ensure treaties and amendments are drafted and signed in a timely manner;
- Provide actuarial support to internal departments (claims, underwriting, admin, etc).

Group Reinsurance Solutions:

- Perform pricing analyses and modelling for new business and renewals;
- Assist with calculation and reporting of financial results and profitability metrics;
- Assess the impact of changes in assumptions and methodologies for various products;
- Provide actuarial support for market studies, underwriting, and product development initiatives;
- Help ensure treaties and amendments are drafted and signed in a timely manner.

Corporate Actuarial:

- Assist in quarter-end financial reporting including conducting reserve movements and analyzing profitability across all Canadian lines of business;
- Prepare results across multiple different bases including Canadian GAAP, Solvency II, USGAAP and local capital requirements (LICAT);
- Support in the review and analysis of actuarial assumptions, such as mortality, lapse and morbidity;
- Contribute to special projects such as IFRS 17 and revamping processes;
- Gain exposure to software, such as AXIS, SQL and Power BI.
- *North American Model Development (NA MD):*
 - Quantify and explain impacts of model changes under multiple reserving bases, as applicable (SII, USGAAP, US Stat, CGAAP, IFRS17);
 - Build a model for new business treaties from beginning to end; which includes reading in data, assigning assumptions and explaining the results;
 - Create new tools to help find key insights into the inforce business;
 - Support on model related requests from various teams across North America.

Global Actuarial Consulting Group (GACG):

- Assist in the development of actuarial tools used by Munich Re offices around the world (e.g. IFRS17 Transition Calculators);
- Build actuarial models for unique, region-specific reinsurance structures for internal global clients (includes both valuation and pricing models for new quotes);
- Support experience studies and development of actuarial assumptions for new quotes;
- Provide stewardship services globally related to Munich Re's actuarial modelling and experience analysis software.

Qualifications

We're looking for well-rounded individuals who are technically astute, have strong communication skills, and demonstrate the ability to build positive relationships with internal clients. We're seeking energetic and collaborative professionals who are excited to join our winning team and show promise of becoming a future leader in the reinsurance space.

Specifically, we're looking for the following qualifications:

- Currently pursuing an undergraduate degree in Actuarial Science, Math, or Statistics, Risk Management, or equivalent program - in healthy academic standing;
- Successful completion of one SOA exam (with two or more preferred);
- Excellent communication skills - spoken & written, formal/informal presentation;
- Demonstrated ability to create and manage positive professional relationships with good client service acumen;
- Proven capability to multi-task and successfully self-manage multiple priorities and projects of various significance;
- Exhibits solid organizational skills and rigorous attention to detail/accuracy in a fast-paced environment;
- Demonstrates leadership qualities - clear-thinking, curiosity, integrity, and drive;
- Proficient in Microsoft Excel, Access, and Word;
- Exposure to AXIS is considered an asset;
- Preference for candidates who have relevant work experience, having already completed at least one placement (or approx. 4+ months co-op/intern experience).

Note that this opportunity is open to both current students who are returning to in-class studies upon the completion of the work term, as well as recent graduates who have obtained their degree within the past year.

HOW TO APPLY

Interested candidates are to apply directly via the Munich Re portal at:

<https://bit.ly/3PZeD3g>

Note that only applications received through this channel will be considered.

For candidates who are participating in a formal internship program with their school, it's recommended that you adhere to

Please note that only candidates who are selected for interview will be contacted directly.
We thank all candidates for their interest.

Munich Re Canada is committed to providing a work environment that is inclusive and free of employment barriers and discrimination. Accommodations will be made for qualified applicants with a disability throughout the recruitment process. If you receive a request for an interview and you have a disability which will require an accommodation to support your participation, please consult with Human Resources or contact AODARquestHR@munichre.ca as soon as practical so that suitable accommodations can be arranged.
