

## Actuarial Consulting Internship 2026

Risk Modelling Services – Life, Property and Casualty, Pension

### Our Firm

At PwC, we work together to provide exceptional industry-focused services to clients from 26 offices across Canada. We're part of a global network, connected to almost 370,000 people in 149 countries who bring international experience and insights to our clients whether it is in Advisory, Deals, Assurance and Tax services.

Our actuarial practice is one of the largest among all accounting firms in Canada with over 80+ professionals specializing in either Life and Health, Property and Casualty (P&C) and Pension. We provide actuarial advisory services and audit support to many other key players in the insurance industry, including international and Canadian insurance and reinsurance entities. In addition, we continue to enhance our services for Finance Modernization, Quantitative Risk Modelling, Climate Risk Modelling, Predictive Modelling and much more for the insurance industry and beyond.

### Your Benefits

During your internship, you will have a chance to explore industry-leading opportunities with partners and mentors who are committed to your professional growth. Our wide range of networks will allow you to work in a diversity of projects and build a solid foundation for your career. You will be part of our Enhanced Working Practices, where we teach rather than tell. You will develop your analytical skills, hone your leadership abilities, and broaden your knowledge of the insurance industry through shadowing, team workshops, mentorship touchpoints, and continuous feedback.

We recognize the importance of a good work environment and promote flexible ways of working that suit your lifestyle.

Benefit from where you work – join us and seize the opportunity of a lifetime.

### Your Responsibilities

As an Actuarial Associate co-op student on our team, your responsibilities may include the following projects:

Life

- Use a broad range of tools such as AXIS and techniques to extract insights from current trends in the business area;
- Assist the team in re-performing actuarial products, examine and review valuation methodologies and assumptions; and
- Share findings and recommendations to non actuarial teams in a clear and non-technical manner.

P&C

- Contribute to the team's appointed actuary services, including actuarial liability valuation, quarterly monitoring, and financial condition testing;
- Assist with audit support activities, such as re-performing actuarial liability valuations and reviewing valuation methodologies and assumptions;
- Enhance operational efficiency by identifying opportunities to automate manual processes; and
- Participate in business development and ad-hoc initiatives (i.e. pricing, climate risk initiatives, model risk management).

Pension

- Support the consulting and audit services to various defined benefit plan sponsors and government agencies;
- Work on actuarial funding and accounting valuation work, pension administration, and a variety of other consulting opportunities;
- Assist in the financial performance analysis on pension and post-retirement benefits plans for corporates; and
- Assist with other strategic analysis work or ad-hoc projects, as required.

## Your Experiences and Aptitudes

What we look for:

- You are pursuing a bachelor's degree in Actuarial Science, Mathematics, Statistics, Finance, Computer Science or a related field
- You have work experience that demonstrates strong technical and/or client service skills
- You are a team player who is capable of working in a fast-paced environment and under multiple tight deadlines
- You have an entrepreneurial mindset and strive to be challenged
- You have strong written and verbal communication skills
- Advanced proficiency in the Microsoft Office suite, including Excel, PowerPoint, and Word
- Experience in programming language such as R and Python is an asset
- Working towards the CIA and/or SOA/CAS designation
- Bilingual in French-English – Need to interact on a regular basis with colleagues in Canada and internationally

### Period

**Pension:** Winter 2026

**Life:** Summer 2026, Fall 2026

**P&C:** Summer 2026, Fall 2026
