

JOB DESCRIPTION

Position: Actuarial Analyst
Department: Corporate Actuarial – Montreal
Position status: Internship - Temporary
Availability: Summer 2025

Are you wondering what your actuarial math classes are for? Want to apply a contagion factor to a joint policy in a real business setting? Do you want to determine the results' credibility of a real mortality study? Do you like a challenge?

Reporting to the Actuarial Associate, Corporate Actuarial, the Actuarial Analyst will perform a variety of tasks to meet the departmental objectives. As part of a creative and dynamic team, you will be exposed to a wide variety of insurance products and will be asked to contribute in various other areas that will benefit from your creative and analytical mind.

Primary functions:

- Participate in the preparation of financial statements and other actuarial reports, including the calculation of actuarial liabilities for the policies according to Canadian and US standards
- Support the production of financial projections and collaborate in the analysis and production of reports
- Participate in the preparation of data and modeling of the actuarial reserves for different business lines
- Provide support for the revision of different assumptions used in the actuarial evaluations

Requirements:

- Bachelor in Actuarial studies, in progress
- Successful completion of at least one exam from the Society of Actuaries and/or actively progressing in a CIA University Accreditation Program
- Software knowledge: Excel, Word, Access, Outlook
- Experience in the insurance industry, an asset
- Other specific software: AXIS, an asset

Abilities:

- Bilingual, French and English (written and spoken).
(English required due to internal actuarial reporting to our American parent company and communications held with unilingual anglophone employees.)
- Strong communication and interpersonal relations skills
- Sense of organization and detail-oriented
- Solid technical and analytical mind
- Good team spirit
- Ability to work on several files simultaneously

RGA aims to create a culture where individuals are valued, feel a sense of belonging and are respected for their differences - a workplace where all employees are encouraged and supported to reach their full potential.

RGA Canada, a member of an International Group, offers a challenging work environment.
